The screenshot shows the IntelliJ IDEA IDE interface. The Project view on the left displays the project structure for 'SimpleJavaFXApp'. The main editor window shows the 'Main.java' file with the following code:

```
1 package com.example.hellofx;
2 public class Main {
    // no usages new *
}
```

A dialog box titled 'My First JavaFX Application' is displayed in the center, showing the message 'Great! You clicked the button.' and a 'Click Me' button.

The Terminal window at the bottom shows the output of the 'run' command, indicating that the application is running successfully. The output includes a warning about native access and a progress bar showing 80% execution.
